Javonna Neal Charter Township of Ypsilanti Fire OPEB Plan 7200 S Huron River Drive Ypsilanti, MI 48197

This report summarizes the GASB actuarial valuation for the Charter Township of Ypsilanti Fire OPEB Plan 2023 fiscal year. To the best of our knowledge, the report presents a fair position of the funded status of the plan in accordance with GASB Statement No. 74 (Financial Reporting for Post-Employment Benefit Plans Other Than Pension Plans) and GASB Statement No. 75 (Accounting and Financial Reporting by Employers for Post-Employment Benefits Other Than Pensions). This report may not be appropriate for other purposes. Please contact Nyhart prior to disclosing this report to any other party or relying on its content for any purpose other than that explained above. Failure to do so may result in misrepresentation or misinterpretation of this report.

The information presented herein is based on the actuarial assumptions and substantive plan provisions summarized in this report and participant information furnished to us by the Plan Sponsor. Asset information has been provided to us by the trustee. We have reviewed the employee census provided by the Plan Sponsor for reasonableness when compared to the prior information provided but have not audited the information at the source, and therefore do not accept responsibility for the accuracy or the completeness of the data on which the information is based. When relevant data may be missing, we may have made assumptions we feel are neutral or conservative to the purpose of the measurement. We are not aware of any significant issues with and have relied on the data provided.

The discount rate, other economic assumptions, and demographic assumptions have been selected by the Plan Sponsor with the concurrence of Nyhart. In our opinion, the actuarial assumptions are individually reasonable and in combination represent our estimate of anticipated experience of the Plan. All calculations have been made in accordance with generally accepted actuarial principles and practice.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following:

- · plan experience differing from that anticipated by the economic or demographic assumptions;
- · changes in economic or demographic assumptions;
- · increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and
- · changes in plan provisions or applicable law.

We did not perform an analysis of the potential range of future measurements due to the limited scope of our engagement.

To our knowledge, there have been no significant events prior to the current year's measurement date or as of the date of this report that could materially affect the results contained herein.

Neither Nyhart nor any of its employees has any relationship with the plan or its sponsor that could impair or appear to impair the objectivity of this report. Our professional work is in full compliance with the American Academy of Actuaries "Code of Professional Conduct" Precept 7 regarding conflict of interest. The undersigned are compliant with the continuing education requirements of the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States.

#### **Deferred Outflows / (Inflows) of Resources**

Deferred Outflows / (Inflows) of Resources represents the following items that have not been recognized in the OPEB Expense:

- 1. Differences between expected and actual experience of the OPEB plan
- 2. Changes of assumptions
- 3. Differences between projected and actual earnings in OPEB plan investments (for funded plans only)

The initial amortization period for the first two items noted above is based on expected future service lives while the difference between the projected and actual earnings in OPEB plan investment is amortized over five years. All balances are amortized linearly on a principal only basis and new bases will be created annually for each of the items above.

## **Projection of GASB Disclosures**

## Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

The Total OPEB Liability (TOL) is expected to change on an annual basis as a result of expected and unexpected events. Under normal circumstances, it is generally expected to have a net increase each year. Below is a list of the most common events affecting the total OPEB liability and whether they increase or decrease the liability.

#### **Expected Events**

- · Increases in TOL due to additional benefit accruals as employees continue to earn service each year
- · Increases in TOL due to interest as the employees and retirees age
- · Decreases in TOL due to benefit payments

#### **Unexpected Events**

- $\cdot$  Increases in TOL when actual health care costs increase more than expected. A liability decrease occurs when the reverse happens.
- · Increases in TOL when more new retirements occur than expected or fewer terminations occur than anticipated. Liability decreases occur when the opposite outcomes happen.
- · Increases or decreases in TOL depending on whether benefits are improved or reduced.

Actuarially Determined Contribution (ADC) is the target or recommended contribution to a defined benefit OPEB plan, which if paid on an ongoing basis, will provide sufficient resources to fund future costs for services to be earned and liabilities attributed to past services. This is typically higher than the pay-as-you-go cost because it includes recognition of employer costs expected to be paid in future accounting periods.

<sup>&</sup>lt;sup>1</sup> The normal cost has been reduced for projected member contributions.

<sup>&</sup>lt;sup>2</sup> Member contributions for FY 2025 and 2026 are estimated based on FY 2023 member payroll increased by 3.0% wage inflation.

## **Discussion of Discount Rates**

#### Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

Under GASB 74, the discount rate used in valuing OPEB liabilities for funded plans as of the Measurement Date must be based on the long-term expected rate of return on OPEB plan investments that are expected to be used to finance future benefit payments to the extent that (a) they are sufficient to pay for the projected benefit payments and (b) the OPEB plan assets are invested using a strategy that will achieve that return. When the OPEB plan investments are insufficient to cover future benefit payments, a yield for 20-year tax-exempt general obligation municipal bonds with an average rating of AA /Aa or higher (or equivalent quality on another rating scale) must be used.

#### For the current valuation:

- 1. The long-term expected rate of return on OPEB plan investments is targeted to be 6.50%. This was determined based on a target asset allocation of 51% equity, 37% fixed income, 9.00% real estate, and 3% cash.
- 2. The discount rate used when the OPEB plan investments are insufficient to pay for future benefit payments are selected from the range of indices as shown in the table below, where the range is given as the spread between the lowest and highest rate shown.

| Yield as of                                      | December 31,<br>2022 | December 31,<br>2023 |
|--|----------------------|----------------------|
| Bond Buyer Go 20-Bond Municipal Bond Index       | 3.72%                | 3.26%                |
| S&P Municipal Bond 20-Year High Grade Rate Index | 4.31%                | 4.00%                |
| Fidelity 20-Year Go Municipal Bond Index         | 4.05%                | 3.77%                |
| Bond Index Range                                 | 3.72% - 4.31%        | 3.26% - 4.00%        |

3. The final equivalent discount rate used for this year's valuation is 6.50% as of December 31, 2023 and December 31, 2022, which is based on the expectation that the Township will continue to fully fund the Actuarially Determined Contribution (ADC).

## **Substantive Plan Provisions**

Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

**Retirement Eligibility** For employees hired before January 1, 2014, the Township provides retiree health care coverage upon

retirement with 25 or more years of service.

Employees hired on/after January 1, 2014 will not be eligible for retiree health care coverage. Employees are currently contributing toward a Health Savings Account with additional contributions from the Township Fire Fund in the employee's name for health care cost with a 10 year vesting period for the purposes of retirement on the employer's contribution. These individuals are eligible to receive retiree life insurance

benefits from the Township.

**Duty and Non-Duty Disability Retirement** The Township provides Township paid health care to disability retirees with 25 or more years of service.

Benefits commence immediately.

**Duty and Non-Duty Death-in-Service** Surviving spouses of death-in-service members retiring after January 1, 2005 are eligible for Township paid

retiree health care.

**Spouse Coverage**Spouse and eligible dependents are eligible to receive 100% Township paid retiree health care coverage for

the life of the retiree. Township paid coverage continues for surviving spouse and eligible dependents less than 19 years of age of deceased retired member who retired after January 1, 2005. Surviving spouses and eligible dependents of deceased members retiring prior to January 1, 2005 may continue their health care

coverage by reimbursing the cost to the Township.

Medicare Part B Retirees who retired prior to January 1, 1989 are reimbursed the cost of Medicare Part B. Effective January 1,

2024, Medicare Part B costs are \$174.70 per month.

**Retiree Contributions** Retired employees do not contribute toward retiree health care core benefits. Active employees hired prior

to January 1, 2014 contribute 4% of wage toward retiree health care core benefits. If employees elected to

enter the DROP, as of January 1, 2014, they will continue to contribute 4% toward retiree health care.

Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

The actuarial assumptions used in this report represent a reasonable long-term expectation of future OPEB outcomes. As national economic and Township experience change over time, the assumptions will be tested for ongoing reasonableness and, if necessary, updated.

The discount rate, other economic assumptions, and demographic assumptions have been selected by the Plan Sponsor with the concurrence of Nyhart. In our opinion, the actuarial assumptions are individually reasonable and in combination represent our estimate of anticipated experience of the Plan. All calculations have been made in accordance with generally accepted actuarial principles and practice.

There are changes to the actuarial assumptions since the last GASB valuation, which was for the fiscal year ending December 31, 2022. Refer to Actuary's Notes section for complete information on these changes. For the current year GASB valuation, we have also updated the per capita costs. We expect to update discount rate, health care trend rates, mortality table, and per capita costs again in the next full GASB valuation, which will be for the fiscal year ending December 31, 2025.

**Measurement Date** For fiscal year ending December 31, 2023, a December 31, 2023 measurement date was used.

Actuarial Valuation Date January 1, 2024

Liabilities as of December 31, 2023 are based on an actuarial valuation date of January 1, 2024 with no adjustments to get to the December 31, 2023 measurement date.

Liabilities as of December 31, 2022 are based on an actuarial valuation date of January 1, 2022 projected to

December 31, 2022, reflecting actual premiums and contributions.

**Discount Rate** 6.50% as of December 31, 2023 and December 31, 2022 for accounting disclosure purposes.

6.50% for funding disclosure purposes (in calculating the Actuarially Determined Contribution)

Refer to the Discussion of Discount Rates section for more information on selection of the discount rate.

**Payroll Growth**3.00% wage inflation plus merit and productivity increases are based on the 2023 Pension Experience Study.

Sample rates are as shown below:

| Service | <b>Base Rate</b> | Merit Rate |
|---------|------------------|------------|
| 1       | 3.00%            | 7.00%      |

Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

**Employer Funding Policy** 

The Township fully funds the Actuarially Determined Contribution (ADC). The annual ADC is determined based on the annual normal cost and amortization of the Net OPEB Liability. This amortization amount is calculated using the Level Dollar amortization method, the discount rate for each year, and a decreasing amortization period of 22 years for FYE 2023.

**Cost Method** 

Allocation of Actuarial Present Value of Future Benefits for services prior and after the Measurement Date was determined using Entry Age Normal Level % of Salary method where:

- Service Cost for each individual participant, payable from date of employment to date of retirement, is sufficient to pay for the participant's benefit at retirement; and
- Annual Service Cost is a constant percentage of the participant's salary that is assumed to increase according to the Payroll Growth.

**Census Data** 

Census information as of December 31, 2023 was provided by the Township in February 2024. We have reviewed it for reasonableness and no material modifications were made to the census data.

**Experience Study** 

Best actuarial practices call for a periodic assumption review and Nyhart recommends the Township to complete an actuarial assumption review (also referred to as an experience study) in the future.

**Health Care Coverage Election Rate** 

Active employees with current coverage: 100%

Active employees with no coverage: 100% assumed to receive opt-out coverage

Inactive employees with current coverage: 100%

Inactive employees with no coverage: 100% assumed to receive opt-out coverage

The participation rates are based on the Township's historical experience.

**Spousal Coverage** 

Spousal age and coverage level for current retirees is based on actual data.

90% of active employees are assumed to elect spousal coverage at retirement and husbands are assumed to be three years older than wives. The spousal age difference is based on the actual observed age difference among the Township's population of married individuals who are of retirement age.

#### **Per Capita Costs**

Annual per capita costs are calculated based on the premium rates effective on January 1, 2024 actuarially increased using aging factors and current enrollment. Costs are assumed to increase according to health care trend rates.

Annual per capita costs are as shown below:

| Age     | Male      | Female    |
|---------|-----------|-----------|
| < 50    | \$ 5,300  | \$ 7,300  |
| 50 - 54 | \$ 7,400  | \$ 8,500  |
| 55 - 59 | \$ 10,100 | \$ 9,700  |
| 60 - 64 | \$ 13,200 | \$ 11,900 |
| 65 – 69 | \$ 3,300  | \$ 3,300  |
| 70 – 74 | \$ 3,800  | \$ 3,800  |
| 75+     | \$ 4,400  | \$ 4,400  |

The per capita costs represent the cost of coverage for a retiree-only population.

Actuarial standards require the recognition of higher inherent costs for a retired population versus an active population.

Dental and vision per capita costs are assumed to be equal the premium rates of \$381 for dental coverage and \$102 for vision coverage.

#### **Explicit Subsidy**

The difference between (a) the premium rate and (b) the retiree contribution. Below is an example of the monthly explicit subsidies for a retiree age 62 with spouse of the same age who was hired prior to January 1 2014.

|         | Premium<br>Rate | Retiree<br>Contribution | Explicit<br>Subsidy |
|---------|-----------------|-------------------------|---------------------|
|         | Α               | В                       | C = A - B           |
| Retiree | \$ 692.40       | \$ 0.00                 | \$ 692.40           |

Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

**Implicit Subsidy** 

The difference between (a) the per capita cost and (b) the premium rate. Below is an example of the monthly implicit subsidies for a male retiree age 62 with spouse of the same age.

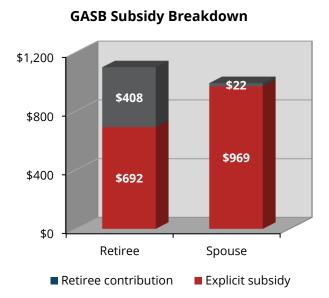

|         | Per Capita<br>Cost | Premium<br>Rate | Implicit<br>Subsidy |  |
|---------|--------------------|-----------------|---------------------|--|
|         | Α                  | В               | C = A - B           |  |
| Retiree | \$ 1,100.00        | \$ 692.40       | \$ 407.60           |  |
| Spouse  | \$ 991.67          | \$ 969.34       | \$ 22.33            |  |

All employers that utilize premium rates based on blended active/retiree claims experience will have an implicit subsidy. There is an exception for Medicare plans using a true community-rated premium rate.

#### **Detailed Actuary's Notes**

There have been no substantive plan provision changes since the last full valuation, which was for the fiscal year ending December 31, 2021.

The following assumptions have been updated:

- 1. The payroll growth rate assumption has been updated based on the 2023 Pension Experience Study. This change led to a slight decrease in liabilities.
- 2. Health care trend rates have been set to an initial rate of 8.0%/6.5% for Pre 65/Post 65, decreasing by 0.5%/0.25% for Pre 65/Post 65 annually to an ultimate rate of 4.5%. Part B trend rates have been set to an initial rate of 5.5% decreasing by 0.25% to an ultimate rate of 4.5%. Dental and vision rates are assumed to increase 4.0% and 3.0% annually in the future, respectively. These changes caused an increase in liabilities.

Additionally, claims costs and premiums were updated for 2024 which caused a decrease in liabilities. The updated census data also resulted in a slight increase in liabilities.

#### **PA 202 Uniform Assumption Disclosures**

The information presented below is for the purposes of filing Form No. 5572 under PA 202 uniform assumption requirements. Per regulation, Form No. 5572 must be filed no later than six months after the end of the fiscal year. Governmental fund revenues are not shown below and should be determined by the Township. Refer to the Michigan Department of Treasury website for additional information.

| Form 5572 Line | Description                                     | Township     |

#### Charter Township of Ypsilanti Fire OPEB Plan GASB 74/75 Valuation for Fiscal Year Ending December 31, 2023

GASB 75 defines several unique terms not commonly employed in the funding of pension and retiree health plans. The definitions of the terms used in the GASB actuarial valuations are noted below.

- 1. **Actuarial Assumptions** Assumptions as to the occurrence of future events affecting health care costs, such as: mortality, withdrawal, disablement and retirement; changes in compensation and Government provided health care benefits; rates of investment earnings and asset appreciation or depreciation; procedures used to determine the Actuarial Value of Assets; characteristics of future entrants for Open Group Actuarial Cost Methods; and other relevant items.
- 2. **Actuarial Cost Method** A procedure for determining the Actuarial Present Value of Future Benefits and expenses and for developing an actuarially equivalent allocation of such value to time periods, usually in the form of a Service Cost and a Total OPEB Liability.
- 3. **Actuarially Determined Contribution** A target or recommended contribution to a defined benefit OPEB plan for the reporting period, determined in accordance with the parameters and in conformity with Actuarial Standards of Practice.
- 4. **Actuarial Present Value** The value of an amount or series of amounts payable or receivable at various times, determined as of a given date by the application of a particular set of Actuarial Assumptions. For purposes of this standard, each such amount or series of amounts is:
  - a. adjusted for the probable financial effect of certain intervening events (such as changes in compensation levels, Social Security, marital status, etc.);
  - b. multiplied by the probability of the occurrence of an event (such as survival, death, disability, termination of employment, etc.) on which the payment is conditioned; and
  - c. discounted according to an assumed rate (or rates) of return to reflect the time value of money.
- 5. **Deferred Outflow / (Inflow) of Resources** represents the following items that have not been recognized in the OPEB Expense:
  - a. Differences between expected and actual experience of the OPEB plan
  - b. Changes in assumptions
  - c. Differences between projected and actual earnings in OPEB plan investments (for funded plans only)
- 6. **Explicit Subsidy** The difference between (a) the amounts required to be contributed by the retirees based on the premium rates and (b) actual cash contribution made by the employer.
- 7. **Funded Ratio** The actuarial value of assets expressed as a percentage of the Total OPEB Liability.

- 8. **Healthcare Cost Trend Rate** The rate of change in the per capita health claims costs over time as a result of factors such as medical inflation, utilization of healthcare services, plan design, and technological developments.
- 9. **Implicit Subsidy** In an experience-rated healthcare plan that includes both active employees and retirees with blended premium rates for all plan members, the difference between (a) the age-adjusted premiums approximating claim costs for retirees in the group (which, because of the effect of age on claim costs, generally will be higher than the blended premium rates for all group members) and (b) the amounts required to be contributed by the retirees.
- 10. **OPEB** Benefits (such as death benefits, life insurance, disability, and long-term care) that are paid in the period after employment and that are provided separately from a pension plan, as well as healthcare benefits paid in the period after employment, regardless of the manner in which they are provided. OPEB does not include termination benefits or termination payments for sick leave.
- 11. **OPEB Expense** Changes in the Net OPEB Liability in the current reporting period, which includes Service Cost, interest cost, changes of benefit terms, expected earnings on OPEB Plan investments, reduction of active employees' contributions, OPEB plan administrative expenses, and current period recognition of Deferred Outflows / (Inflows) of Resources.
- 12. **Pay-as-you-go** A method of financing a benefit plan under which the contributions to the plan are generally made at about the same time and in about the same amount as benefit payments and expenses becoming due.
- 13. **Per Capita Costs** The current cost of providing postretirement health care benefits for one year at each age from the youngest age to the oldest age at which plan participants are expected to receive benefits under the plan.
- 14. **Present Value of Future Benefits** Total projected benefits include all benefits estimated to be payable to plan members (retirees and beneficiaries, terminated employees entitled to benefits but not yet receiving them, and current active members) as a result of their service through the valuation date and their expected future service. The actuarial present value of total projected benefits as of the valuation date is the present value of the cost to finance benefits payable in the future, discounted to reflect the expected effects of the time value (present value) of money and the probabilities of payment. Expressed another way, it is the amount that would have to be invested on the valuation date so that the amount invested plus investment earnings will provide sufficient assets to pay total projected benefits when due.
- 15. **Real Rate of Return** the rate of return on an investment after adjustment to eliminate inflation.

- 16. **Select and Ultimate Rates** Actuarial assumptions that contemplate different rates for successive years. Instead of a single assumed rate with respect to, for example, the investment return assumption, the actuary may apply different rates for the early years of a projection and a single rate for all subsequent years. For example, if an actuary applies an assumed investment return of 8% for year 20W0, then 7.5% for 20W1, and 7% for 20W2 and thereafter, then 8% and 7.5% are select rates, and 7% is the ultimate rate.
- 17. **Service Cost** The portion of the Actuarial Present Value of projected benefit payments that are attributed to a valuation year by the Actuarial Cost Method.
- 18. **Substantive Plan** The terms of an OPEB plan as understood by the employer(s) and plan members.
- 19. **Total OPEB Liability** That portion, as determined by a particular Actuarial Cost Method, of the Actuarial Present Value of Future Benefits which is attributed to past periods of employee service (or not provided for by the future Service Costs).
